

ODOUR BUSTER

PRODUCT DESCRIPTION & BENEFITS

ODOUR BUSTER is a unique cationic-based formulation designed to neutralize a wide range of malodors by targeting specific organic molecules and reducing their concentration in the vapor phase. This biodegradable, non-flammable and non-corrosive solution features a light, pleasant scent and is safe for use on any surface unaffected by water. It can be applied through spraying, fogging, misting, or dripping for versatile and effective odor control.

TREATMENT AND DOSAGE REQUIREMENTS

For space deodorization in homes, hotels and cars:

Use "as-is" to deodorize very foul odour. For minor odour, dilute 1 part ODOUR BUSTER with up to 10 parts water. Spray into the airspace in living room, bathroom, and kitchen a trigger sprayer.

For land fill areas:

Depending on the severity of odour, use "as-is" or dilute 1:4 with water and spray sparingly onto the land fill areas using a pressure sprayer.

For sewage treatment plants:

Drip-fed directly into the line, at the last point where the raw sewage enters the sewage plant.

Likewise, apply as space deodoriser using a misting sprayer at the rate of 1 part ODOUR BUSTER to 100 parts water.
